

Natural Breast Augmentation: Large Volume Fat Transfer To The Breast

Todd Malan, M.D.

- The first Surgeon in the Western U.S. to Perform Smartlipo™
- Has performed more Laser-Lipolysis cases than any other US Surgeon
- Keynote speaker for emerging body contouring and liposuction Technologies at the annual meeting for the American Academy Of Cosmetic Surgeons (AACS) 2007
- Developer of the Natural Breast/Fat Transfer Augmentation Procedure

This two day course is designed to introduce Physicians, currently proficient in Tumescent Liposuction, to a new minimally invasive procedure utilizing Autologous fat micro-grafting. This procedure offers single-stage, large volume transfer resulting in volume increases of 100 to 350 cc on two year follow-up. Graft survival averaged over 90%. This new and innovative procedure is now being recognized as the future of cosmetic breast surgery as well as breast reconstruction
